

What has been your most memorable moment in the industry?

The moments are infinite. From new park construction to caring for record-breaking roller coasters and slides, the best part of my work is, no question, the lasting friendships that are part of those memories.

What emerging challenges do you foresee in the amusement industry, and how is Baynum Amusement Solutions positioned to tackle them?

The biggest challenge for our industry is staffing. The best products and services require the best team members to bring them to life. That's why it is so important to cultivate teams, not just employees. We treat our co-workers and our clients like family.

Outside of the amusement industry, what hobbies or activities help you recharge?

I absolutely love what I do; I can't call it work. But when it's time to relax and recharge, family is number one. Travel, enjoying great food, football games, golf or just sitting around the fire, my favorite times are spent with family and friends.

Strengthening Baynum's Foundation

Walt Bowser's leadership has driven initiatives that have solidified Baynum Amusement Solutions' prominent position in the amusement industry as a turn-key solutions provider:

- **Slide Safety and Surface Refinement:** Gelcoat and water slide restoration processes prioritize optimal slide surface conditions and utilize top-tier coatings.
- **Asset Protection and Longevity:** Implementation of superior coatings and corrosion mitigation strategies for steel roller coasters, attractions, and structures to maximize lifespan.
- **Comprehensive Attraction Maintenance:** Development of full maintenance plans and management of contracted jobs to effectively support annual park programs.
- **Attraction Installation and Construction Services:** Establishment of a dedicated division offering seamless installation solutions, emphasizing the expertise of experienced industry veterans while prioritizing safety and operational excellence.
- **Trusted Industry Partnerships:** Collaboration with key ride manufacturers and innovative suppliers, such as iSlide and Life Floor, to leverage the latest advancements in materials and technology.
